The Three Waves

By Dolores Cannon

My work as a Past Life Regression Therapist has led me to conclude that broadly speaking, there have been three waves of souls coming to Earth in recent decades.

The purpose of the three waves is two-fold. One: to change the energy of the Earth so it can avoid catastrophe. And two: to help raise the energy of the people so they can ascend with the Earth into the next dimension. Estimating the approximate ages of the three waves came about while having sessions with many hundreds of people. They all said the same things about their present lives, and they all went back to the same situations during the session. So I began to roughly categorize them according to their present age.

The first wave of these souls, in their late 40s to early 60s (after the dropping of the H bomb at the end of the 1940's) now, have had the most difficult time adjusting. They don't like the violence and ugliness they find in this world and want to return "home" – even though they have no idea, consciously, where that might be. Emotions disturb and even paralyze them especially

strong ones like anger and hate. They cannot handle being around people expressing them. These dramatically affect them, as though emotions are foreign to them. They are used to peace and love because that was what they experience where they came from. Even though these people seem to have a good life, loving family and a good job, many of them try to commit suicide. There seems to be no logical reason, yet they are so unhappy they don't want to be here.

The second wave, are now in their late 20s and 30s. They are moving through life much more easily and are generally focused on helping others, creating no karma, and normally going unnoticed. They have been described as antennas, beacons, generators, channels of energy. They have come in with a unique energy that greatly affects others. They don't have to do anything. They just have to be. I have been told that just by walking through a crowded mall or grocery store their energy affects everyone they come in contact with. It is that strong, and of course, they do not realize this consciously. The paradox is that although they are supposed to be affecting people by their energy, they really don't feel comfortable being around people. So many of them stay home secluded, to avoid mixing with others; even working from their homes. Thus they are defeating their purpose. Many of the first and second wave do not want to have children. They unconsciously realize that children create karma, and they don't want to have anything tie them here. They just want to do their job and get out of here. Many of them do not marry, unless they are lucky enough to find another of their own kind.

The third wave, are the new children, many of whom are now in their teens. They have come in with all the knowledge needed, on an unconscious level. The DNA of everyone on Earth is being altered at the present time and changed in order to adjust to the new vibrations and frequencies. *The Three Waves continues on Page 4.*

What is Sound Therapy?

By Dean Carter

Using the pure sounds of the vocal overtone, Tibetan bowls and crystal bowls as carrier waves of healing intent, the sound therapist works on the client's *subtle energy body*, the *chakras* and *nadis*.

In the Vedic system, the subtle body, underlies and acts as an energetic matrix or blueprint for the physical body, comprising of three main 'channels' or *nadis*; the *sushumna*, *ida* and *pingala*. At the points where the *ida* and *pingala* criss-cross the *sushumna*, lie the main energy centres, the *chakras*.

Using dowsing, the functioning and health of these centres can be gauged, whether they are blocked, open, etc. Sound therapy gives the subtle body chakras a 'wash and brush up'. Blocked chakras opened, imbalanced chakras stabilised, and so on. Over a given time patterns emerge as to which are the weaker or stronger chakras which usually relates directly to physical and or emotional dysfunction in a person. With intensive work weaker chakras can be stabilised and return to optimal functioning, leading to improvement in overall physical/emotional/mental functioning, and/or symptom alleviation of specific problems. *For further information about sound therapy email Dean at the Centre for Pure Sound in Dorset.* ahiahel@live.com

The Three Waves (continued from Page 1)

The DNA of the new children has already been altered and they are prepared to proceed with little or no problems. Of course, many of these children are misunderstood by the schools and are sadly being medicated. A recent medical report has now announced that 100 million children have been misdiagnosed with ADHD, and put on Ritalin and other drugs. There is nothing wrong with these children. They are just more advanced and operating on a different frequency. Because they are so intelligent they become easily bored at school. I have been told that they need challenges to keep them interested. This group has been called the "hope of the world." Some of these children are only nine or ten years old and have already graduated from college. They are forming organizations, and amazing, these are organizations to help the children of the world!

I asked "them" one time why the first wave had the most difficulty. They said that someone had to be the pioneers, the trail blazers, the ones to show the way. They carved the path that would make it easier for the others who followed them. *Dolores Cannon is facilitating a number of events in the UK and Ireland during September as part of the New Earth Tour.* www.universal-mind.co.uk
